Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Dick (US Patent # 5,720,193). Dick discloses a firearm safety device for a firearm having a frame, a trigger and a trigger guard, said firearm safety device comprising: a first assembly (reference 1R) for mounting to a first side of the trigger guard to prevent access to the trigger; a second assembly (reference 1F) for mounting to a second side of the trigger guard opposite said first side and having the ability to be secured to said first assembly to prevent access to the trigger; and a lip (reference 26) disposed about the periphery of one of said first and second assemblies for overlapping the other of said first and second assemblies when said first and second assemblies are secured together (Figures 1, 2 and 9). Wherein said lip is disposed about the periphery of said first assembly (Figure 2). Wherein said lip extends around portions of said first assembly periphery not abutting the firearm when said first assembly is secured to the firearm (Figure 1). Further comprising a second lip (reference 71) extending around a portion of the periphery of said second assembly for overlapping said first assembly when said first and second assemblies are secured together (Figures 1 and 49). Wherein said lip extends around a portion of the periphery of said second assembly (Figure 2). Wherein said lip extends around portions of said first assembly periphery not abutting the firearm when said first assembly is

secured to the firearm (Figure 1). Further comprising: a lock for locking said first and second assemblies together on the firearm (references 2L and 2U). Wherein said first assembly and said second assembly each include a plurality of apertures for receiving pins (references 24 and 29). Further including a pin (references 79 and 80) having a first end having the ability to be received in one of said plurality of apertures in said first assembly and a second end having the ability to be received in one of said plurality of apertures in said second assembly, said pin extending between said first and second assemblies when said first and second assemblies are joined together (Figure 5).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brauer (US Patent # 6,655,067), Upton (US Patent # 5,153,360), Neal (US Patent # 5,768,819), and Carlson (US Patent # 5,778,586).
